**NEUROFIBROMATOSIS
TYPE 1 AND 2:
FROM GENETICS
TO NEUROSURGERY**
AN UPDATE IN PEDIATRIC AGE

"Neurofibromatosis are a formidable clinical challenge, overlapping many clinical and surgical disciplines. In recent years the advances in genetics and targeted therapies introduced new diagnostic and therapeutic options but raised at the same time new questions. We are glad to invite you in Naples to a meeting dedicated to Neurofibromatosis, focused on new perspectives and advances in standard clinical and surgical options. An extraordinary panel of international experts will offer a panoramic update on some of the most important and discussed aspects of these conditions and we will be glad to welcome you in the city with the largest and most typical historical center of Europe. The Scientific Committee".

SCIENTIFIC COMMITTEE

Giuseppe Cinalli (Santobono-Pausilipon Children's Hospital, Naples, Italy)
 Daniela Melis (Federico II University, Naples, Italy)
 Silverio Perrotta (Luigi Vanvitelli University, Naples, Italy)
